Danish Energy Agreement 2012-2020

These are the headline results for 2020:

2020

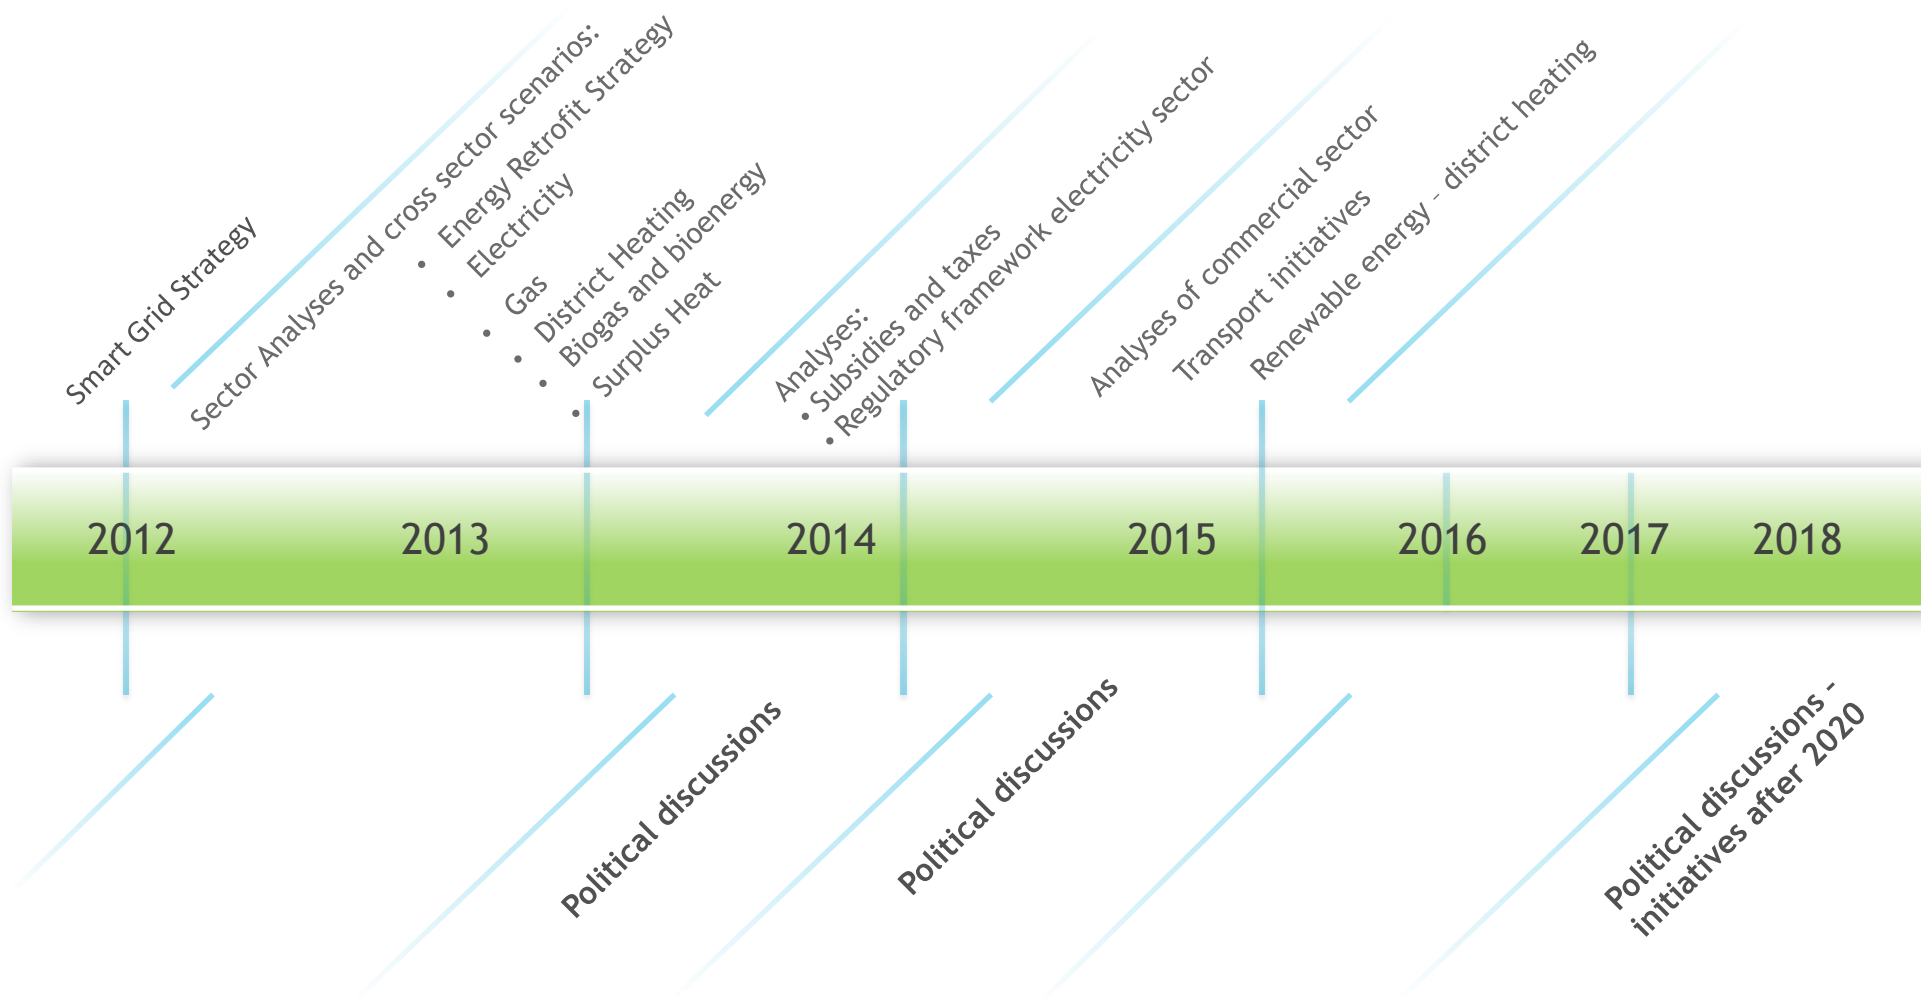

More than 35% renewable energy
in final energy consumption

Approximately 50% of electricity
consumption to be supplied by wind power

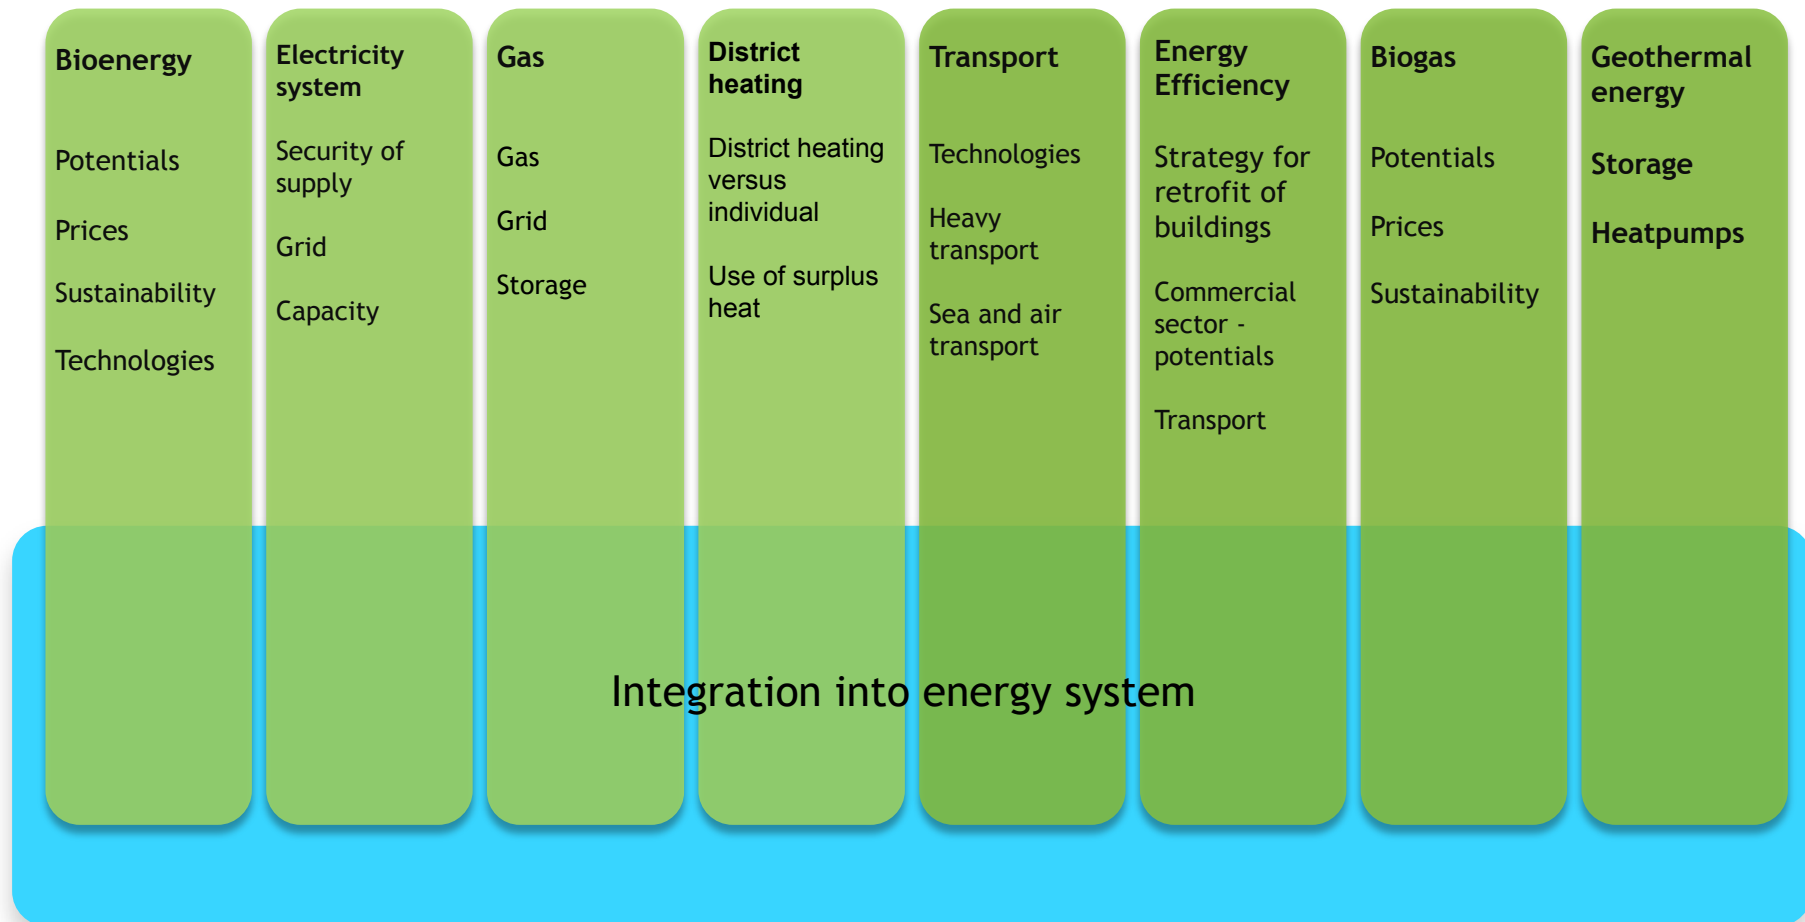

7.6% reduction in gross energy
consumption in relation to 2010

34% reduction in greenhouse
gas emissions in relation to 1990

Analyses and scenarios – Energy system

→ Energy System Scenarios across all analyses

The Danish Climate Policy Plan

Figure: Changes in emissions, 1990-2020 in relation to the 40% reduction target

EUDP - Energy Technology Development and Demonstration Program

Purpose

❑ Support energy policy objectives

- Security of supply
- Combating climate change
- Economic growth

❑ Further develop existing strong industrial positions within energy technology and realise the potential to increase exports of energy technology and know how

❑ Establish a competitive

Activities

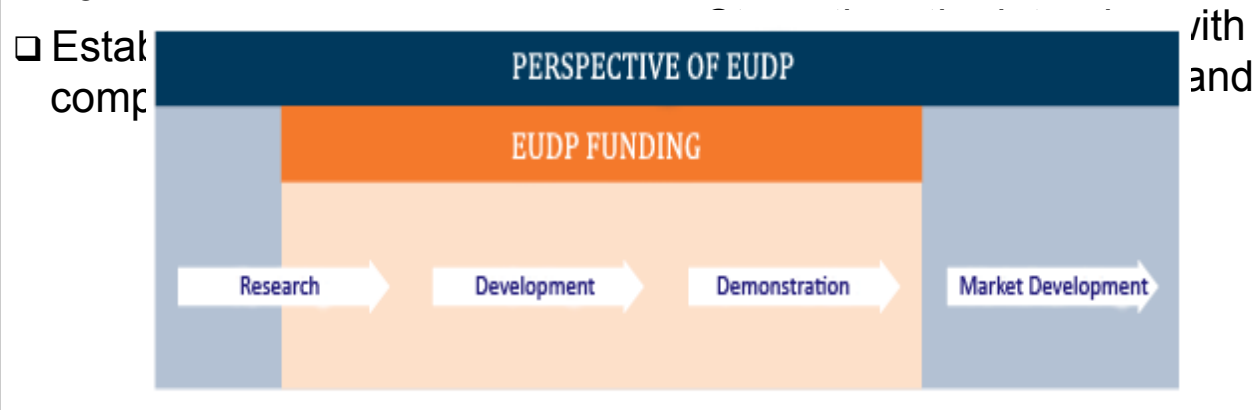

❑ Subsidies for

- Development and demonstration
- Research supporting development and demonstration
- Technology development in Denmark

❑ Encourage public private partnerships / cooperation

Fast Facts

- ❑ Established 2007
- ❑ Independent board
- ❑ 371 projects in 2008-12
- ❑ 400 m DKK in 2013

EUDP - Energy Technology Development and Demonstration Program

Selection Criterias

- 1) Energy & technological
- 2) Commercial
- 3) Organisation, cooperation & knowledge sharing
- 4) Incentive effect
